PROFILE

I am a fourth-year Computer Science student seeking a cooperative education internship as a Full-Stack or Backend Developer. I bring a robust technical foundation in the PERN stack, relational databases (PostgreSQL, MySQL), and standard deployment workflows using Docker and Git/GitHub. Beyond coding, my experience in system analysis and UML architectural modeling enables me to effectively bridge the gap between business requirements and software implementation. I am eager to contribute my technical expertise to a cross-functional team, applying software engineering principles to solve real-world problems and drive impactful results.

EDUCATION

Rajamangala University of Technology Krungthep

Bachelor of Science (Computer Science)

Cumulative GPA : 3.94

Expected Graduated 2027

PROJECTS

Trouble Tracking System | *Full-Stack Developer*

2026 - Present (In-Progress)

- Architected and developed a scalable full-stack web application for various issue tracking, employing a decoupled architecture to separate frontend, backend, and cloud storage services.
- Engineered robust RESTful APIs with Node.js and Express.js, utilizing Prisma ORM for efficient PostgreSQL database management, alongside built a high-performance frontend using React 19 and Vite.
- Implemented secure user authentication using Google OAuth 2.0 and JWT, and integrated Cloudinary with Multer for optimized media upload and asset management.
- Deployed the application seamlessly using Vercel (Frontend) and Render (Backend), while maintaining automated email notifications via Nodemailer and utilizing Docker/Git for standardized development workflows.

Tour Booking System | *Frontend Developer*

2025

- Developed the User Interface (UI) for a football stadium tour ticket booking website also designed and coded responsive web pages to ensure a seamless and interactive User Experience (UX) across various devices.

Computer Hardware POS System | *Java Developer*

2024

- Developed a comprehensive desktop application for Computer Hardware Store management, featuring storefront, inventory management, and sales reporting modules.
- Built the Graphical User Interface utilizing Java Swing within the Eclipse IDE along with integrated a MySQL database via JDBC to handle CRUD operations.

SKILLS

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js

Programming Language: Javascript, Java, Python

Database: PostgreSQL, MySQL, Prisma ORM

Tools & Platforms: Docker, Git, GitHub, Postman, Figma, Google Cloud Console, Cloudinary, Ngrok, Neon, Render, Vercel

System Design & Modeling: UML (Use Case, Class, Sequence, Activity, etc.), ER Diagrams.

Soft Skills: Communication, Design Thinking, Problem Solving, Adaptability
